When keying the H201 screen for a new cert, if the individual is missing any one or more of the three (3) required proofs, key a Y in the missing proof field.

Key the family size, income, and financial eligible fields the same as they were keyed on the H401/H421 screens.

Key the H401/H421 screen the same as before without the income fields.

When there is a Y in the missing proof field on the H202 screen, the system will allow printing of FI's for the month of the service date only. For any consecutive months, a message "chk proof" will be displayed on a FI print screen (H651/H652). Print the allowed FI's and ignore the 2nd month in the example above.

There is no need to change the food package on the cert record after printing FI's. The P food package codes will no longer be valid in those fields.
